

## Phishing academic review and research

Project Title	Phishing academic review and research
Project Summary	In this project, your assignment is primarily to perform a literature review of the social science around phishing, and inform a team that performs authorized phishing engagements about what they should be aware of.
Country	United States
Agency	Homeland Security Department
DoS Office	N/A
Post	N/A
Section	N/A
Number of Interns	1

## Project Description

You'll research and documents answers to questions like:

- \* What kinds of lures are most likely to work against most targets?
- \* How can a team that mimics malicious phishers best incentive better practices from the targets, and what are those better practices?
- \* What legal ramifications should those who phish be aware of?

We seek strong writers who have an awareness of the information security field, but applicants need not be hacker types themselves.

## Desired Skills Interests

## Additional Information

Our team are a welcoming bunch who work to secure the federal government and beyond! We need your help.
